# Exam problem Lesson 3

The user of a computer has just downloaded a website which URL address is www.company.net/index.html, next she click on a link that takes her to www.company.net/hello.html

The figure shows all the TCP_PDUs that has been exchanged to show the website hello.html.

Answer the following questions:

1. Assign a value to all '?'
2. Does it use a persistent connection?
3. Has hello.html references to other objects?
4. How many GET HTTP_PDUs have been sent? How many bytes have the HTTP_PCI and HTTP_UD?
5. How long is hello.html if the HTTP_PCI has the same size as in the previous question?
6. Does the web browser have a copy of saludo.html in cache?
